

Energies

- 20% increase in our energy efficiency between 2010 and 2020
- Switching all lighting to LEDs.
- Lights out during breaks.

EIG / Transport

Membership of the EIG* (Economic Interest Grouping) in order to optimise full truckload traffic and thus **limit the carbon footprint** of deliveries to our customers.

Eco-grazing

Implementation in 2016 of an eco-grazing system, made up of goats and sheep, to **maintain the land and improve the safety of the site** by cleaning up its surroundings.

Ecocert / « Greening »

- Development of the Greening culture and sustainable development through the strategy.
- Development of ECOCERT certifiable products by the T&I team and obtaining the label in 2019.
- Use of organic detergent for the cleaning processes.

Recycling

- In 10 years, the percentage of recycled waste has increased from **69,5% to 92%**.
- Since 2020, actions to reduce quality waste have been undertaken through the processes.

And many others ...
